Cover Letter

Dear Hiring Manager,

I am writing to apply my 15+ years of signal integrity design, simulation, and validation experience to engineering opportunities for high-speed electronic systems.

Why I’m a strong fit:

- Signal integrity subject matter expert across full product development cycles
- Expert with Ansys HFSS, SIwave, Q3D Extractor, CST Studio Suite, and Agilent ADS
- High-speed test equipment: VNA, TDR, and BERT measurements
- Interconnect and electronic packaging design — differential connectors, cable assemblies, RF connectors
- PCB layout with Altium Designer, including fabrication and assembly
- High-frequency benchmarking (Cadence EMX, Keysight RFPro) for MMIC applications
- Mentor and technical speaker; drives competitive analysis and IP positions

I apply electromagnetic theory and circuit behavior to solve complex engineering problems across high-frequency simulation, PCB/package/advanced packaging, and technical leadership — equipping me to excel in signal integrity for high-speed interconnects and electronic packaging.

I am eager to drive product innovation, ensure signal integrity compliance, and help create safer, more sustainable, and more connected solutions.

Thank you for your consideration. I look forward to discussing how my experience can contribute to your team’s success.

Sincerely,

Laurent Ntibarikure
